

National Conservation Easement Database

File Geodatabase Feature Class

Tags

Conservation Planning, Conservation Easement, GAP codes, environment, boundaries

Summary

NCED shows a comprehensive picture of privately owned conservation easement lands in the U.S. The NCED will allow better strategic planning for conservation and development by merging data on land protection with biodiversity and resources, improving ecological and economic plans and investments. State and regional planners and managers will appreciate this dataset as it provides critical contextual information for their work. Institutions responsible for national and international reporting will find this database full of reliable, accurate information for their purposes. The scientific and conservation community will similarly benefit from having this standardized base map to carry out their research and planning objectives.

Description

The National Conservation Easement Database (NCED) is a collaborative venture to compile easement records (both spatial and tabular) from land trusts and public agencies throughout the United States in a single, up-to-date, sustainable, GIS compatible, online source. The goal of the NCED is to provide a comprehensive picture of the privately owned conservation easement lands, recognizing their contribution to America's natural heritage, a vibrant economy, and healthy communities. Conservation easements are legal agreements voluntarily entered into between landowners and conservation entities (agencies or land trusts) for the express purpose of protecting certain societal values such as open space or vital wildlife habitats. In some cases landowners transfer "development rights" for direct payment or for federal and state tax benefits.

Credits

The NCED project partners would like to thank the U.S. Endowment for Forestry and Communities for their leadership and forethought for putting the NCED team together and for the initial funding that allowed the NCED to be formed. Additional support for the NCED project was provided by the Gaylord and Dorothy Donnelley Foundation; the Knobloch Family Foundation; the Graham Foundation and the USDA Forest Service, State and Private Forestry. We would also like to thank Greg Schildwachter for his leadership skills in guiding the project partners through the initial two-year journey. While the NCED partners were responsible for aggregating conservation easements from across the country, the NCED database would not have been successful without the cooperation of many federal, state, and local agencies, regional and state data repositories, and individual land trusts. We would like to thank the many state and federal agencies and local land trusts that took part in this endeavor. In addition, we would like to provide specific acknowledgement of the following organizations for their provision of state-wide, regional or national data: COMap - Colorado State University; Clemson University, David Holman - Greater Chicago area protected lands; Delaware Valley Regional Planning Commission; Florida Natural Areas Inventory; GreenInfo - California

Protected Areas Database; Kansas Natural Heritage Inventory; Kentucky Natural Heritage Program; Maine State Planning Office; Maryland Environmental Trust; Montana Natural Heritage Programs, University of Montana in partnership with the Montana State Library; Nebraska Natural Heritage Program, Nebraska Game and Parks Commission; The Nature Conservancy; Utah Conservation Data Center, State of Utah Natural Resources, Division of Wildlife Resources; Virginia Natural Heritage Program, Department of Conservation and Recreation; Natural Resources Conservation Service; U.S. Fish and Wildlife Service; U.S. Forest Service.

Use limitations

Please note that, by downloading or viewing this data, no right has been created to access lands with conservation easements. Most conservation easements are not open to the public. Entering an area that is not open to the public subjects an individual to possible sanctions for trespass, as determined by the state in which the easement is located. The National Conservation Easement Database (NCED) layer was created using a variety of sources and may contain both location and attribute errors. The NCED database was developed for conservation planning purposes and should not be used for legal purposes. NCED makes no representation or warranty of any kind regarding this material, data and information, including, but not limited to, the accuracy of the material, data and information or its suitability for any purpose. All use of the material, data and information is at the user's sole risk. By using any of this material, data and information, the user agrees that NCED is not responsible for their use of the material, data and information or the results thereof. The NCED is a work in progress. The NCED partners strive to make this database as complete and accurate as possible. Please contact the NCED team at <http://www.conservationeasement.us/contact> to make corrections or additions to the database.

VALUE Recreation or Education

DESCRIPTION (26 CFR 1.170A-14(d)(2)) - requires substantial and regular use by the general public, and does not fit any other definition.

ENUMERATED DOMAIN VALUE DEFINITION SOURCE IRS

VALUE Environmental System

DESCRIPTION (26 CFR 1.170A-14(d)(3)) - Protects significant, high quality examples of terrestrial or aquatic habitats or ecosystems where a fish, wildlife or plant community live. These include but are not limited to, habitats for rare, endangered, or threatened species, or lands contributing to the ecological viability of another conservation area.

ENUMERATED DOMAIN VALUE DEFINITION SOURCE IRS

VALUE Historic Preservation

DESCRIPTION (26 CFR 1.170A-14(d)(5)) - protects historic values of an area or structure that either is officially designated as such or adjoins such an area or structure, or presents historic values consistent with such official designations.

ENUMERATED DOMAIN VALUE DEFINITION SOURCE IRS

VALUE Open Space - Farm

DESCRIPTION (26 CFR 1.170A-14(d)(4)) - provides scenic (i.e., visual) enjoyment for the general public, helps fulfill a public policy that provides open space by restricting development, or serves another significant public benefit such as preserving the uniqueness of the surrounding area or consistency with public policies promoting conservation. Sub-value: farm (if the land is to be planted with annual plants in part or in full any time during the term of the easement).

ENUMERATED DOMAIN VALUE DEFINITION SOURCE IRS

VALUE Open Space - Ranch

DESCRIPTION (26 CFR 1.170A-14(d)(4)) - provides scenic (i.e., visual) enjoyment for the general public, helps fulfill a public policy that provides open space by restricting development, or serves another significant public benefit such as preserving the uniqueness of the surrounding area or consistency with public policies promoting conservation. Sub-value: ranch (if the land is to be hayed or grazed and not planted with an annual)

ENUMERATED DOMAIN VALUE DEFINITION SOURCE IRS

VALUE Open Space - Forest

DESCRIPTION (26 CFR 1.170A-14(d)(4)) - provides scenic (i.e., visual) enjoyment for the general public, helps fulfill a public policy that provides open space by restricting development, or serves another significant public benefit such as preserving the uniqueness of the surrounding area or consistency with public policies promoting conservation. Sub-value: forest (if the land is to be forested and not farmed or ranched).

ENUMERATED DOMAIN VALUE DEFINITION SOURCE IRS

VALUE Open Space - Other

DESCRIPTION (26 CFR 1.170A-14(d)(4)) - provides scenic (i.e., visual) enjoyment for the general public, helps fulfill a public policy that provides open space by restricting

development, or serves another significant public benefit such as preserving the uniqueness of the surrounding area or consistency with public policies promoting conservation. Sub-value: other (if nothing else applies, e.g., for a beach or marsh).
